

Front-End Development

DOM Manipulation & Animation

DOM

DOM (Document Object Model) is a platform & language neutral interface that will allow programs & scripts to dynamically access & update the content, structure & style of documents.

It means DOM is an API to work with HTML-like document. Manipulating DOM means using this API to change the document: adding, removing or moving elements.

```
<head>
  <script src="js/jquery-3.2.1.min.js"></script>
  <style>
    .myClass {
      color:yellow;
      background:blue;
    }
  </style>
</head>
<body>
  <div id="container">
    <button id="btn1">Tombol</button>
    <p class="para1">Ini paragraf 1</p>
    <p class="para2">Ini paragraf 2</p>
  </div>
  <script>
    $(document).ready(function(){
      // $('p.para1').css({color:'red', background:'yellow'});
      // $('p.para2').addClass('myClass');
      // $('p.para2').removeClass('myClass');
    });
  </script>
</body>
```

DOM Manipulation

Add/Remove Class

DOM Manipulation

Toggle Class

```
<head>
  <script src="js/jquery-3.2.1.min.js"></script>
  <style>
    .myClass {
      color:yellow;
      background:blue;
    }
  </style>
</head>
<body>
  <div id="container">
    <button id="btn1">Tombol</button>
    <p class="para1">Ini paragraf 1</p>
    <p class="para2">Ini paragraf 2</p>
  </div>
  <script>
    $(document).ready(function(){
      $('#btn1').click(function(){
        $('p.para1').toggleClass('myClass');
        $('p.para2').toggleClass('myClass');
      });
    });
  </script>
</body>
```

DOM Manipulation

Set Content Value

```
<body>
  <div id="myDiv"></div>
<script>
  $(document).ready(function(){
    // $('#myDiv').text('Halo semuanya!');
    // $('#myDiv').html('<h1>Halo!</h1>');
    // alert($('#myDiv').text());
  });
</script>
</body>
```

```
<body>
  <p class="para1">Ini paragraf 1</p>
  <p class="para2">Ini paragraf 2</p>
  <ul>
    <li>Ini list 1</li>
    <li>Ini list 2</li>
    <li>Ini list 3</li>
  </ul>
```

DOM Manipulation *Append & Prepend*

```
<script>
  $(document).ready(function(){
    // $(' .para1' ).appendTo( ' .para2' );
    // $(' .para1' ).prependTo( ' .para2' );
    // $(' ul' ).append( '<li>Ini append list</li>' );
    // $(' ul' ).prepend( '<li>Ini prepend list</li>' );
    // $(' ul' ).before( '<h4>Berikut adalah list:</h4>' );
    // $(' ul' ).after( '<h4>Demikianlah list.</h4>' );
    // $(' ul' ).empty();
    // $(' ul' ).detach();
  });
</script>
</body>
```

```
<body>
  <p class="para1">Ini paragraf 1</p>
  <p class="para2">Ini paragraf 2</p>
  <ul>
    <li>Ini list 1</li>
    <li>Ini list 2</li>
    <li>Ini list 3</li>
  </ul>
<script>
  $(document).ready(function(){
    var x = $('.para1').text();
    $('ul').append('<li>' + x + '</li>');
  });
</script>
</body>
```

DOM Manipulation *Append & Prepend*

DOM Manipulation

Add Attribute

```
<body>
  <a href="http://google.com">Klik!</a>
<script>
  $(document).ready(function(){
    // $('a').attr('target', '_blank');
    // alert($('a').attr('href'));
    // $('a').removeAttr('target');
  });
</script>
</body>
```

DOM Manipulation

Wrap Elements

```
<body>
  <p class="para1">Ini paragraf 1</p>
  <p class="para2">Ini paragraf 2</p>
<script>
  $(document).ready(function(){
    // $('p').wrap('<h1>');
    // $('p').wrapAll('<h1>');
  });
</script>
</body>
```

DOM Manipulation

Print Array On Console

```
<body>
<script>
$(document).ready(function(){
    var myArr = [ 'Andi', 'Budi', 'Caca' ];
    $.each(myArr, function(i, val){
        console.log(val);
    });
});
</script>
</body>
```

DOM Manipulation

Print Array On Web Page

```
<body>
  <ul id="users"></ul>
<script>
$(document).ready(function(){
  var myArr = [ 'Andi', 'Budi', 'Caca' ];
  $.each(myArr, function(i,x){
    $('#users').append('<li>'+x+'</li>');
  });
});
</script>
</body>
```

DOM Manipulation

Convert Lists to Array

```
<body>
  <ul id="list">
    <li>Andi</li>
    <li>Budi</li>
    <li>Caca</li>
  </ul>
  <script>
$(document).ready(function(){
  var newArr = $('ul#list li').toArray();
  $.each(newArr, function(i,val){
    console.log(val.innerHTML);
  });
});
</script>
</body>
```

JavaScript Key Codes

DOM Manipulation

JavaScript Key Codes

```
<body>
  <input type="text">
<script>
$(document).ready(function(){
$( 'input' ).keyup(function(x){
    var code = x.which;
    console.log(code);
});
});
</script>
</body>
```

DOM Manipulation

Input & Add List

```
<body>
  <input type="text" id="newItem">
  <ol></ol>
<script>
$(document).ready(function(){
$( '#newItem' ).keyup(function(x){
var code = x.which;
if(code==13){
x.preventDefault();
$( 'ol' ).append( '<li>'+x.target.value+'</li>' );
};
});
});
</script>
</body>
```

paha ayam 2 kg

1. beras 1 kg
2. gula 2 kg
3. paha ayam 2 kg

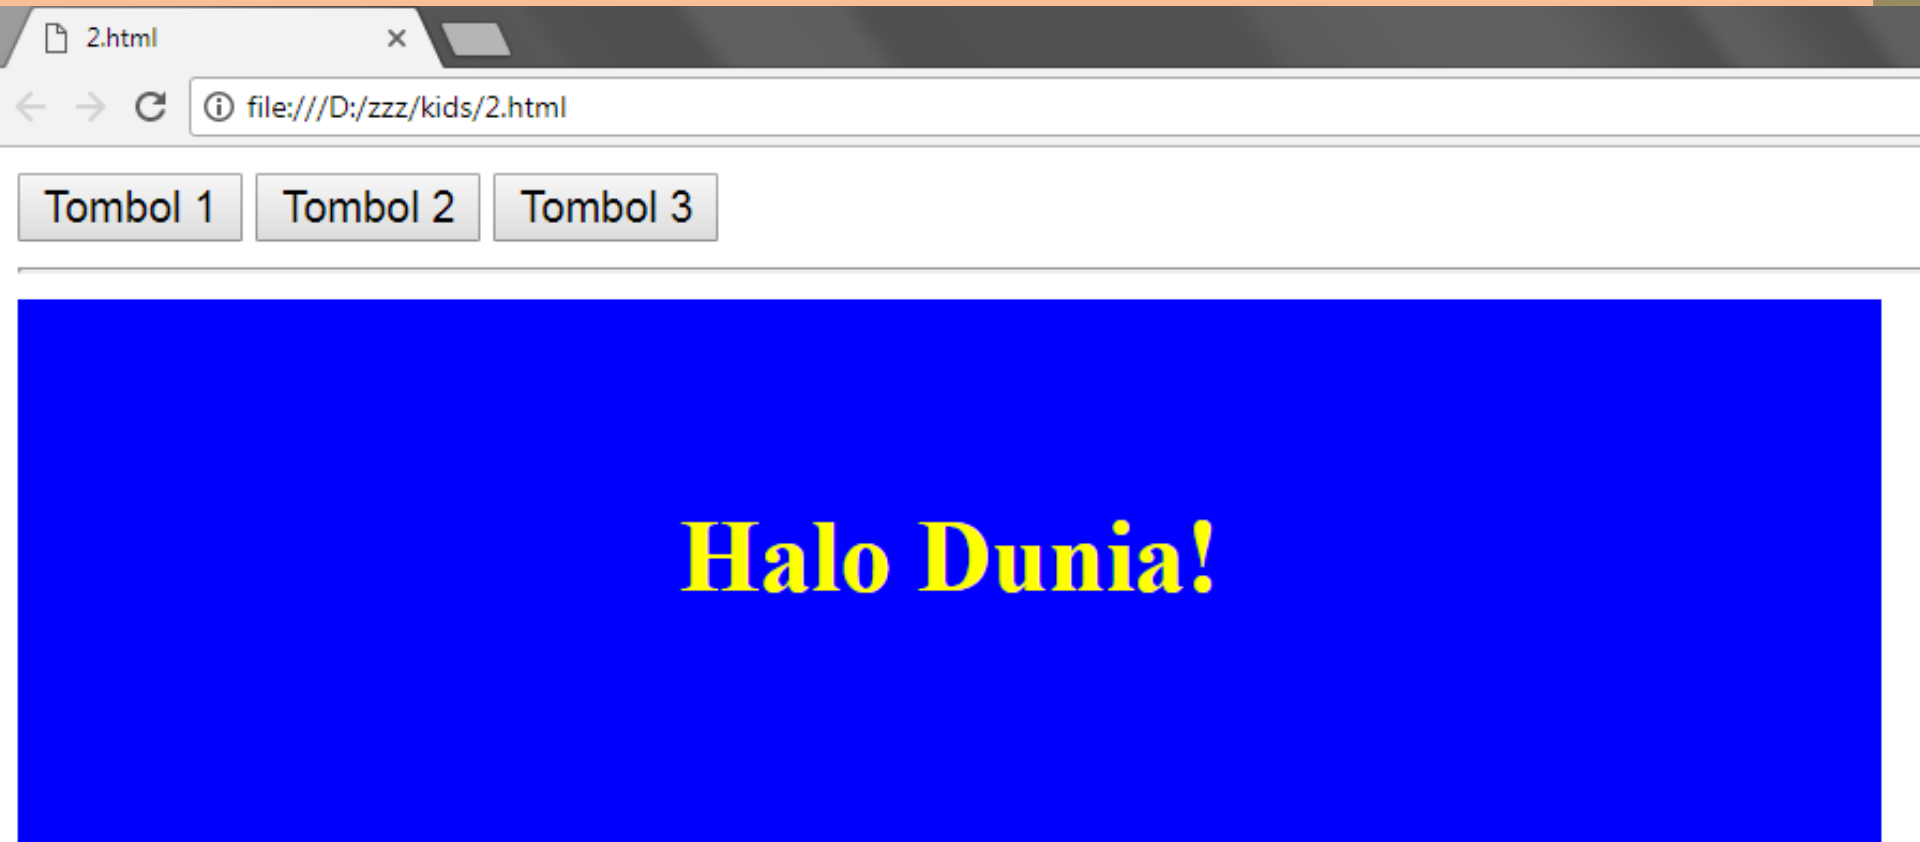

DOM Manipulation

Input, Add List & Refresh

```
<body>
  <input type="text" id="newItem">
  <ol></ol>
<script>
$(document).ready(function(){
$( '#newItem' ).keyup(function(x){
var code = x.which;
if(code==13){
x.preventDefault();
$( 'ol' ).append( '<li>'+x.target.value+'</li>' );
  $( ':text' ).val( '' );
  // x.target.value = '';
};});});
</script>
</body>
```

Animation

Template

#part 1

```
<head>
<script src="js/jquery-3.3.1.min.js">
</script>
<style>
    #box{
        background:blue;
        color:yellow;
        width:500px;
        height:90px;
        padding:40px;
        text-align:center;
    }
</style>
</head>
```

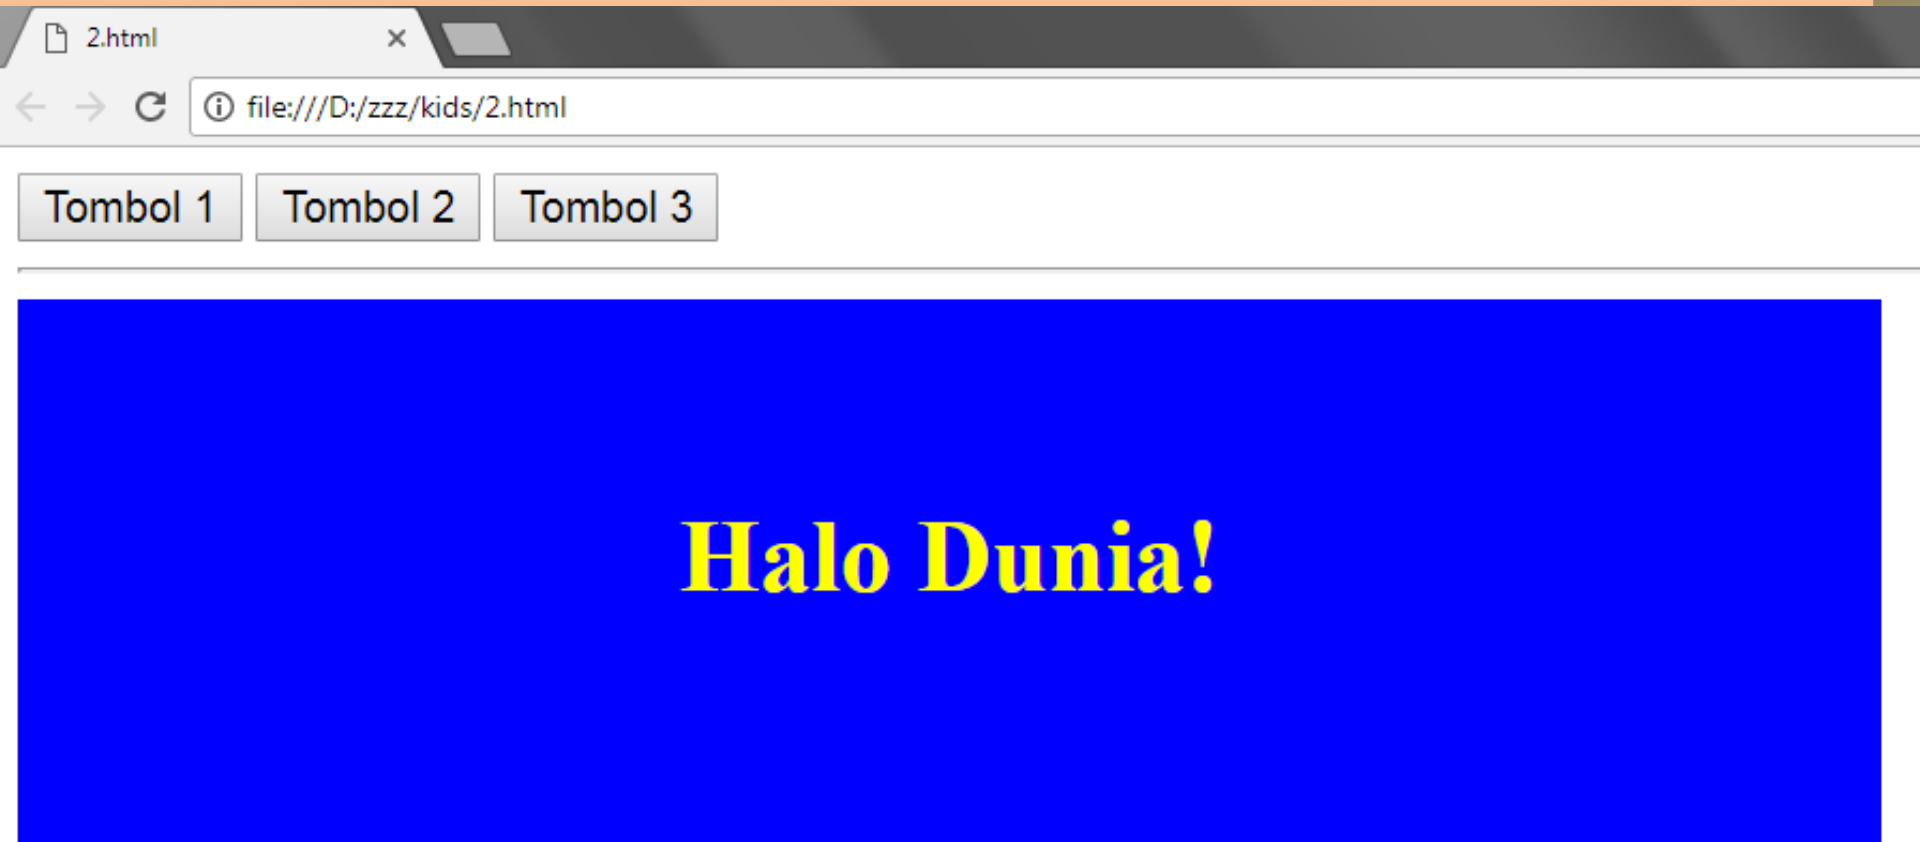

Template

#part 2

```
<body>
<div id="container">
  <button id="tombo11">Tombol 1</button>
  <button id="tombo12">Tombol 2</button>
  <button id="tombo13">Tombol 3</button>
  <hr>
  <div id="box"><h1>HaLo Dunia!</h1></div>
</div>
<script>
  $(document).ready(function(){

  });
</script>
</body>
```

Animation

Animation

Fade Effects

```
<script>
